We Are More Than Our Name

United Cerebral Palsy (UCP) of Oregon & SW Washington offers individualized supports, information & referral, and advocacy for adults, children and families with cerebral palsy and other developmental disabilities.

Our mission is to advance the independence, productivity, and full citizenship of people with disabilities.

Since 1955, we have been committed to continuously improving supports for people experiencing developmental disabilities, and to discovering new ways to assist all individuals to lead meaningful and fulfilling lives, full of personal choice, that are rich in community experiences and relationships.

What is a Developmental Disability?

A Developmental Disability is a lifelong condition attributable to a broad spectrum of mental or physical impairments.

For example: cerebral palsy (CP) is a condition affecting movement and muscle coordination. It is caused by damage to areas of the brain, usually occurring during fetal development, birth, or infancy. CP may affect muscle tone, walking, movement, sensation, perception, ability to learn, sight, hearing or speech. It can cause spasms, involuntary movement and seizures.
